Some Database Structures

1. Offered Courses (from RPS)

Course Code	Course Name	Credit	Semester	AC Year
CSE 6279	Big Data Analysis and Management	3	Summer	2023-2024
CSE 6273	Cloud Computing	3	Summer	2023-2024
CSE 6231	Deep Learning	3	Summer	2023-2024
	Advanced Machine Learning	3	Summer	2023-2024
CSE 6265	Advanced Image Processing	3	Winter	2023-2024
CSE 6275	Advanced Human Computer Interaction	3	Winter	2023-2024
	Advanced Natural Language Processing	3	Winter	2023-2024

2. Student Course List (To keep track of how many credits covered)(for every student)

Course Code	Obtained Credit	Credit
CSE 6279	3	3
CSE 6273	2.97	3

Task List

1. Choosing Supervisor

a. Student end

- ☐ Will be able to see basic information, Result (fetched from RPS), Grades, Credits completed
- ☐ Timeline / Progress bar
Enrolled → Supervisor assignment → Thesis Proposal Submission → Thesis Submission → Predefense → Defense
- ☐ Each step will be automatically unlocked when requirements are fulfilled.
- ☐ When 9 credits are completed (from RPS), the supervisor assignment option will be available
- ☐ Students can request for a supervisor or list of supervisors (3 with priority 1,2,3) from a list of available supervisors.
- ☐ When a supervisor is assigned it will be notified to the student and he/she can proceed to next step (Thesis proposal submission)
- ☐ If rejected then needs to request again

b. Faculty/Supervisor end

- ☐ Be able to see the student he/she supervises with details of the research topic, thesis stage they are in.
- ☐ View supervisor request by students, their research interests, their current results. (can accept or reject)

- ☐ If accepted, the request will be forwarded to PGC for further approval.
- ☐ If rejected, the supervisor request will go to the next person in the supervisor priority list.

c. PGC end (will be further developed)

- ☐ Will have an option to view the supervisor request, student and requested supervisor information displayed side by side (number of students currently under that supervisor, domain, etc.).
- ☐ Approve or reject

To be noted –

Each faculty member is assigned a course load, which represents the number of students they can supervise (each credit hour corresponds to one student/supervision). This value can be retrieved from the Admin or stored as a column in the database (Remaining Course Load). A faculty member cannot supervise more students than their assigned course load allows. When a student selects a supervisor, faculty members who have already reached their supervision quota will not appear in the list of available supervisors. Once a supervisor is approved, their remaining course load will be reduced by 1.

2. Thesis Proposal and Approval

a. Student end

- ☐ Requirements
 1. ≥ 9 credits (Masters)
 2. $CGPA \geq 2.5$
- ☐ Thesis Proposal option unlocked
- ☐ A form with fields Title, Background & Problem Statement, Objective, Methodology, Estimated Cost and Timeline, References and attachment (pdf document)

b. Supervisor end

- ☐ Updated

c. PCG end

- ☐ Review
- ☐ Give Feedback

d. Supervisor end

- ☐ Final Approval
